

## **No Cost Pollution Prevention Assessments for Food, Beverage, Aerospace and Metal Manufacturers**

Pollution prevention is any practice that reduces, eliminates, or prevents pollution at its source. Most manufacturers generate waste and could benefit from an assessment by reducing waste and lowering overall operating costs.

A no cost assessment will be performed in one day at your facility by our team of professionals. A written summative report of conservation opportunities, waste reduction and cost savings will be provided within 6-8 weeks.

This service is provided by Northampton Community College's, Emerging Technology Applications Center (ETAC) thanks to a grant from the Environmental Protection Agency. For more than twenty-five years, ETAC has been helping businesses improve their manufacturing processes.

For additional information or to schedule your assessment contact:
